

Dilly foray to Deception Pass State Park, Nov 16, 2019
Identifiers - Harold Mead, Christine Roberts & Fred Rhoades

Gilled Basidiomycota (109 species)

Agaricus augustus
Agaricus buckmacadooli
Agaricus hondensis
Agaricus sp. (a medium sized, dark reddish-brown streaked thing with no odor and a very slight ring)
Amanita augusta
Amanita muscaria
Amanita pantherina
Armillaria ostoyae
Armillaria sinapina
Cantharellula umbonata
Cantharellus formosus
Chlorophyllum brunneum
Chlorophyllum olivieri
Chroogomphus tomentosus
Chrysomphalina aurantiaca
Clitocybe deceptiva
Clitocybe dilatata
Clitocybe fragrans
Clitocybe griseifolia (this was the large Clitocybe that sort of looked like *C. nebularis* but didn't smell like it and had gray gills)
Collybia sp.
Coprinus comatus
Cortinarius acutus
Cortinarius cf. malicorius (in subg. Dermocybe)
Cortinarius cinnamomeus
Cortinarius fuligineofulvis
Cortinarius smithii
Cortinarius spp.
Cuphophyllum pratensis
Cystoderma amianthimum
Cystoderma fallax
Cystoderma sp.
Cystodermella granulosa
Gomphidius oregonensis
Gymnopilus junoneus
Gymnopilus sp.
Hygrocybe aurantiosplendens (-this is under *H. punicea* in MM)
Hygrocybe flavescens
Hygrocybe miniata var. miniata
Hygrophoropsis aurantiaca
Hypholoma capnoides

Hypholoma fasciculare
Inocybe 'geophylla'
Inocybe fraudans (smells strongly of pears- amyl acetate maybe)
Inocybe lilacina
Inocybe pallidicrema (lilac Inocybe)
Inocybe sp. (fibrillose, yellow-brown cap surface)
Inocybe whitei (blushing Inocybe)
Laccaria amethysteo-occidentalis
Laccaria laccata
Lactarius deterrimus
Lactarius luculentus var. laetus
Lactarius luculentus var. luculentus
Lactarius pseudomucidus
Lactarius rubrilacteus
Lactarius rufus
Lactarius scrobiculatus
Lepiota clypeolaria
Lepiota magnispora
Lepiota roseolivida (the beautiful, purple-capped, small Lepiota)
Lepiota sp.
Lepista inversa
Lepista nuda
Leucoagaricus erythrophaeus (this was the very long, rooted Lepiota)
Leucopaxillus albissimus
Leucopaxillus gentianeus
Marasmiellus candidus
Marasmius plicatulus
Marasmius sp.
Melanoleuca melaleuca
Mycena alcalina
Mycena aurantiomarginata
Mycena filipes
Mycena galericulata
Mycena pura
Mycena sp.
Mycena sp. (vaguely purplish brown cap, no odor, not sure what this was on and there was only one)
Mycena sp. single, grey, on twig, galericulata-like
Pholiota sp.
Pluteus exilis (most of what has been called Pluteus cervinus)
Russula abietina gp
Russula americana
Russula brevipes var brevipes
Russula dissimulans
Russula eleaodes
Russula fragilis

Russula mordax
Russula murrilli
Russula queletti
Russula raoultii
Russula silvicola (gp)
Russula stuntzii
Russula xerampelina
Strobilurus trullisatus
Stropharia ambigua
Tricholoma arvernense
Tricholoma murrillianum (aka western Matsutake)
Tricholoma pardinum
Tricholoma pessundatum gp
Tricholoma portentosum
Tricholoma saponaceum
Tricholoma sejunctum
Tricholoma sp. (a red-brown streaked cap - might have been viscid - with a smooth orange brown stem - almost might have been viscid; doesn't fit anything I can find anywhere)
Tricholoma terreum
Tricholoma transmutans
Tricholomopsis decora

Non-gilled Basidiomycota and Ascomycota (35 species)

Bisporella citrina
Clavaria fragilis
Clavulina cinerea
Clavulina coralloides
Clavulinopsis laeticolor
Dacrymyces chrysospermus (looked a bit different than usual with smaller, unlumped fruiting bodies but was all correct microscopically)
Fomitopsis cajanderi
Fomitopsis mounceae
Fomitopsis ochracea
Ganoderma applanatum
Ganoderma oregonense
Helvella maculata
Helvella vespertina
Hydnellum aurantiacum
Hydnum repandum
Hydnum umbilicatum group
Jahnporus hirtus
Lycoperdon pyriform
Lycoperdon umbrinum
Nidula niveotomentosa
Phaeolus schweinitzii
Pseudohydnum gelatinosum

Ramaria stricta var. stricta
Sarcodon fuscoindicum
Sarcodon imbricatus
Stereopsis humphreyi
Stereum sp. (not bleeding)
Suillus brevipes
Suillus caerulescens
Suillus lakei
Thelephora palmata
Trametes versicolor
Xerocomellus zelleri
Xylaria hypoxylon

Lichens (the few on the table):

Cladonia arbuscula
Peltigera neopolydactyla
Peltigera praetextata
