

## Fungi, 11/13/21, Dilly Foray

### Ascomycetes

*Aleurodiscus grantii* (the little pinkish orange cups on a fir branch from the table)  
*Dacrymyces chrysospermus*  
*Helminthosphaeria clavariarum* (on *Clavulina*)  
*Helvella vespertina*  
*Otidea* sp.

### Basidiomycetes

White chunky coral that may have been *Artomyces* species that I wish I'd saved.

*Aureoboletus mirabilis*  
*Auriscalpium vulgare*  
*Bondarzewia occidentalis*  
*Calocera cornea*  
*Clavulina coralloides*  
*Jahnoporus hirtus*  
*Fomes fomentarius*  
*Fomitopsis cajanderi*  
*Fomitopsis mounceae* (red belt conk)  
*Ganoderma oregonense* (also known as *G. tsugae*)  
*Lycoperdon brunneum*  
*Phaeolus shweinetzii*  
*Pseudohydnum gelatinosum* (cat's tongue)  
*Stereum hirsutum*  
*Stereum*, probably *complicatum* (correct, if wrong)  
*Stereopsis humphreyi*  
*Suillus caerulescens*  
*Trametes versicolor*  
*Tremella mesenterica*  
*Ramaria stricta*  
*Ramaria velocimutans*  
*Xerocomellus atropurpureus*  
*Xerocomellus diffractus*  
*Xerocomellus zelleri*

*Agaricus deadorphensis*  
*Agaricus hondensis*  
*Agaricus buckmcaadoi*  
*Amanita muscaria*  
*Amanita pantherinoides*  
*Armillaria nabsnona* (honey mushroom)  
*Armillaria* sp.  
*Baospora myriadophylla*  
*Bolbitius vitellinus*  
*Callistosporium luteo-olivaceum*  
*Cantharellula umbonata*  
*Chrysomphalina aurantiaca*  
*Clitocybe dilatata*  
*Clitocybe nebularis*  
*Clitocybe rivulosa* (sweat-producing clitocybe)  
*Clitocybe* sp. (small, depressed, gray-capped, no odor)  
*Coprinus* sp.  
*Coprinellus micaceus*

*Cortinarius alboriolaceus*  
*Cortinarius* sp.  
*Cortinarius neosanguineus*  
*Cortinarius mucosus*  
*Cortinarius telamonia*  
*Cortinarius seidliae*  
*Cortinarius vanduzerensis* or *livido-ochraceus* or *Cortinarius seidliae* (mature specimen so gills sporulating, so couldn't check immature colour, but stipe very long and rooting and dark brown wrinkled cap)  
*Crinipellis scabella* (a tiny marasmioid thing on needles that Steve had tentatively ID'd as *Marasmius pallidocephalus* but it turned out to be this hairy thing)  
*Craterellus tubaeformis*  
*Cystoderma cystoderma granulosum*  
*Gomphidius oregonensis*  
*Gymnopilus* sp.  
*Gymnopilus ventricosus*  
*Gymnopus acervata*  
*Gymnopus villosipes* gr.  
*Hebeloma* sp.  
*Hygrocybe* sp.  
*Hygrocybe* 'conica' (witch's hat)  
*Hygrophoropsis aurantica* gr. (false chanterelle)  
*Hygrophorus bakerensis*  
*Hypholoma capnoides*  
*Inocybe lilacina*  
*Inocybe geophylla*  
*Inocybe* sp.  
*Inocybe pudica*  
*Inocybe pallidicrema*  
*Laccaria amethysteo-occidentalis*  
*Laccaria bicolor*  
*Laccaria laccata* group  
*Lactarius luculentus* (var *luculentus*)  
*Lactarius substriatus* (the common medium-sized orange one, with somewhat peppery taste and slowly yellowing latex) (This may or may not be instead of *L. luculentus* var *luculentus*, which is what I put without examining them, we could have had both).  
*Lactarius pseudomucidus*  
*Lactarius rubrilacteus* (bloody milk)  
*Lepiota* sp.  
*Leucopaxillus albissimus*  
*Lichenomphalia umbellifera* (based on one of the photos Lin posted)  
*Marasmius oreades* (fairy ring mushroom)  
*Marasmius plicatilis*  
*Marasmiellus candidus*  
*Mycena leptocephala*  
*Mycena pura*  
*Mycena* sp. (a gray mycena on the ground that didn't smell and we didn't collect on my morning walk)  
*Neolentinus kauffmanii*  
*Nolanea sericea*  
*Pluteus* sp.  
*Pluteus exiles* (maybe)  
*Paralepista inversa* or *Paralepista flaccida* (might be same as *P. inversa* - but not sure anyone has addressed it in detail, the common orange-brown "clitocybe")  
*Psathyrella* sp.  
*Rhodocybe* / *Rhodophana nitellina*  
*Russula* (in *aeruginea* gp.)  
*Russula brevipes* var. *brevipes*

*Russula brevipes* var. *acrior*  
*Russula cascadenis*  
*Russula hypofragilis* (new name for local *fragilis*)  
*Russula mordax*  
*Russula nigricans*  
*Russula queletii*  
*Russula rhodocephala* (this was labelled *sanguinea*, a name no longer used for this sp.)  
*Russula silvicola*  
*Russula stuntzii* (huge pile of that)  
*Russula xerampelina* (shrimp ussula)  
*Russula occidentalis*  
*Stropharia ambigua*  
*Suillus lakei*  
*Tricholoma fulvum* s. l.  
*Tricholoma bryogenum*  
*Tricholoma pardinum*  
*Tricholoma platyphyllum*  
*Tricholoma murrillianum* (matsutake)  
*Tricholoma saponaceum*  
*Tricholoma sulphureum*  
*Tricholoma sulphureum* group  
*Tricholoma transmutans*  
*Tricholoma vaccinum*

Christine Roberts, 11/22/21
